PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in full-stack development, AI-powered systems, and IoT-based solutions. Skilled in developing web applications, management systems, and intelligent software solutions using modern technologies. Passionate about problem-solving, innovation, and building impactful real-world applications.

TECHNICAL SKILLS

- Programming & Development: C#, ASP.NET, Flutter, Node.js, HTML, CSS, JavaScript, SQL Server
- AI & Analytics: Python (for AI integration), Machine Learning, Data Analysis, Power BI, Tableau, SPSS
- IoT & Embedded Systems: Sensor data collection, real-time monitoring, IoT device integration
- Tools & Platforms: Visual Studio, Git, Firebase, REST APIs

Soft Skills

- Leadership
- Problem solving
- Team Collaboration
- Agile Methodologies

EDUCATION

Bachelor of Software Engineering

London Metropolitan University,
Sri Lanka
Mar 2025 – Dec 2025

Higher National Diploma in Software Engineering

Esoft Metro Campus, Kandy
Sep 2023 – Feb 2025

Foundation Program in Computer Science

Australian College of Business and Technology,
Kandy
Jun 2022 – Jun 2023

PROJECTS

AgriBee: AI-Powered Smart Beekeeping Management System (Ongoing) – Apiculture Industry

- Developed a smart IoT system to monitor hive health, detect diseases, and optimize bee productivity.
- Implemented real-time sensor data collection, AI-driven analytics, and decision-support dashboards for sustainable agriculture.
- Integrated a customer engagement platform for product and service purchases.
- Tools/Technologies: C#, Flutter, Node.js, SQL, IoT sensors, AI analytics.

Hotel Reservation & Management System (Academic Project)

- Built a full-stack web application for hotel operations including reservations, check-ins, check-outs, billing, and reporting.
- Designed responsive and interactive UI to improve customer and staff experience.
- Tools/Technologies: HTML, CSS, JavaScript, Node.js, SQL.

Gym Chatbot Web Application

- Developed an interactive chatbot with features like BMI calculation, trainer scheduling, workout recommendations, mood-based music playlists, and memory-based conversations.
- Implemented speech synthesis, predefined responses, and local storage learning for improved user experience.
- Tools/Technologies: HTML, CSS, JavaScript.

Goods Shifting Management System (C# ASP.NET Windows Forms)

- Developed a desktop application for managing goods shifting operations across Jobs, Customers, Loads, and Admins tables.
- Implemented advanced search, filtering, CRUD operations, and workflow optimization to streamline scheduling.
- Tools/Technologies: C#, ASP.NET, SQL Server.
